

AI Assisted Coding Ass-14.3

B.Sushanth

2403A52L11 -B50

Task1:

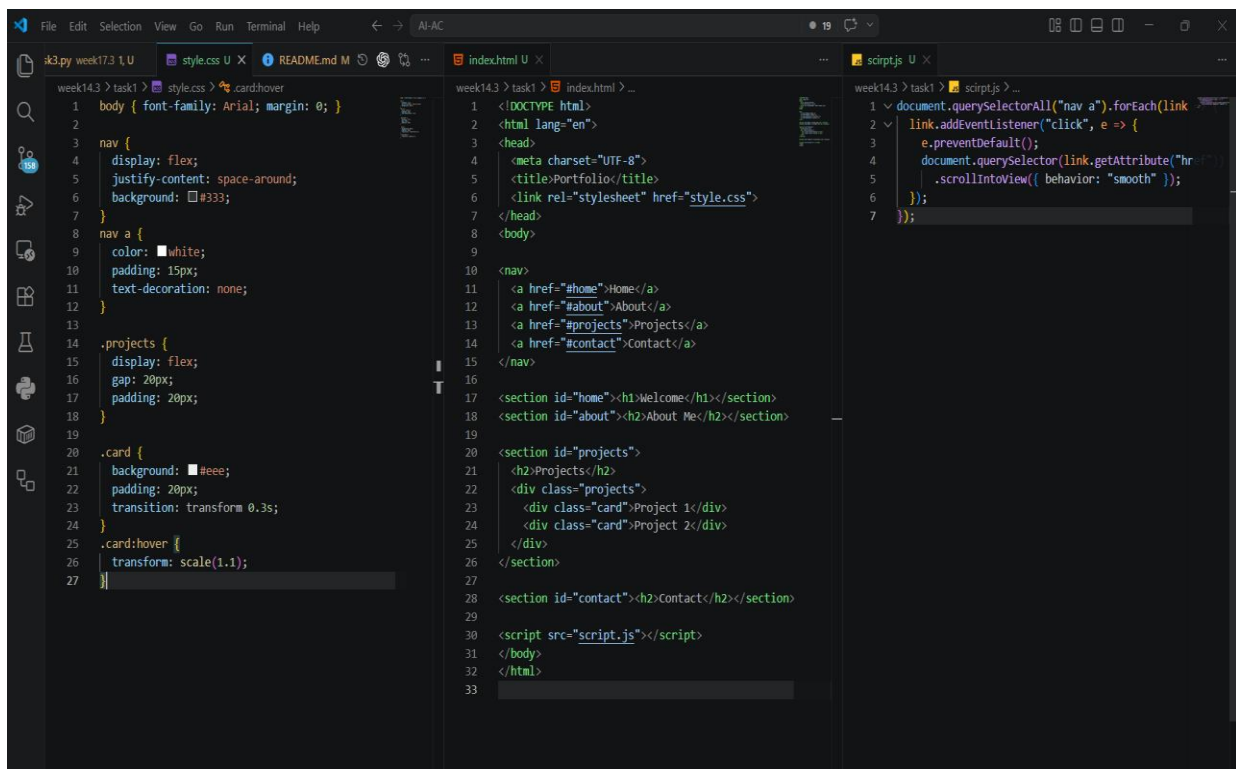

Prompt:

Generate a responsive personal portfolio website using HTML, CSS (Flexbox/Grid), and JavaScript.

Include sections: Home, About, Projects, Contact.

Add smooth scrolling and hover effects for project cards.

Code: CSS; HTML and JS

```

```

Task2:

Prompt:

Create a restaurant landing page with navbar, menu cards, and an image slider using JavaScript.

Add smooth transitions and responsive design.

Code: HTML

<div class="slider">

```

    
</div>

JS:
let images = ["img1.jpg", "img2.jpg", "img3.jpg"];
let i = 0;
setInterval(() => {
    i = (i + 1) % images.length;
    document.getElementById("slide").src = images[i];
}, 2000);

CSS:
.menu {
    display: grid;
    grid-template-columns: repeat(auto-fit, minmax(200px, 1fr));
    gap: 20px;
}
.card {
    border: 1px solid #ccc;
    padding: 15px;
}

```

Task 3 – Event Registration Form

◆ Prompt

Generate an HTML form with validation for name, email, phone, department, and event selection.

Add real-time JavaScript validation and styled UI.

Code:

◆ HTML

```

<form id="form">
  <input type="text" id="name" placeholder="Name" required>
  <input type="email" id="email" placeholder="Email">
  <input type="text" id="phone" placeholder="Phone">
  <button type="submit">Submit</button>
</form>
<p id="msg"></p>

```

◆ JS Validation

```
document.getElementById("form").addEventListener("submit", function(e)
{
  e.preventDefault();
  let email = document.getElementById("email").value;
  let phone = document.getElementById("phone").value;
  if (!email.includes("@")) {
    alert("Invalid Email");
    return;
  }
  if (phone.length !== 10) {
    alert("Phone must be 10 digits");
    return;
  }
  alert("Form submitted successfully!");
});
```

Task 4 – E-Commerce Product Page

◆ Prompt

Create a product grid with Add to Cart functionality.
Include cart counter and visual feedback.

Code:

HTML

```
<h2>Cart: <span id="count">0</span></h2>

<div class="products">
  <div class="card">
    <p>Product 1</p>
    <button onclick="addToCart()">Add</button>
  </div>
</div>
```

◆ JS

```
let count = 0;

function addToCart() {
  count++;
  document.getElementById("count").innerText = count;
  alert("Added to cart!");
}
```

◆ CSS Grid

```
.products
```

```
{
  display: grid;
  grid-template-columns: repeat(auto-fit, minmax(200px, 1fr));
  gap: 20px;
}
```

Task 5 – Responsive Layout

◆ Prompt

Create a responsive webpage with header, main content, and footer using Flexbox. Ensure mobile responsiveness using media queries.

Code:

◆ HTML

```
<header>Header</header>
<main>Main Content</main>
<footer>Footer</footer>
```

◆ CSS

```
body {
  display: flex;
  flex-direction: column;
  min-height: 100vh;
}
```

```
header, footer {
  background: #333;
  color: white;
  padding: 15px;
  text-align: center;
}
```

```
main {
  flex: 1;
  padding: 20px;
}
```

```
/* Responsive */
@media (max-width: 600px) {
  body {
    font-size: 14px;
  }
}
```
